Summary

I'm a Computer Engineer with a keen interest in the integration of hardware and software in building scalable systems. Tech-savvy is an understatement in describing my skillsets as I'm proficient in C++, Java and JavaScript programming languages.

I currently implement frontend web applications using the Bootstrap framework and Vanilla JS with an aspiration to become a full-stack developer.

I am goal driven and team oriented, I strive to get the job done.

Experience

Web Development Intern

Luzoma Microsystems Limited

Apr 2021 - Sep 2021 (6 months)

Built responsive webpages faster as measured by reduced manual HTML input, by implementing frameworks to build projects.
